Brequinar in Resistant − Down : GO Biological Process
cell morphogenesis involved in neuron differentiation
trans−synaptic signaling
small GTPase−mediated signal transduction
axon development
synapse organization
cell junction assembly
axonogenesis
regulation of neuron projection development
regulation of small GTPase mediated signal transduction
sensory system development
eye development
visual system development
cell−substrate adhesion
establishment or maintenance of cell polarity
regulation of cell morphogenesis
cell−matrix adhesion
neuron projection guidance
establishment of cell polarity
regulation of cell−matrix adhesion
cell−substrate junction assembly
