Brequinar in Sensitive − Down : GO Biological Process
trans−synaptic signaling
chemical synaptic transmission
anterograde trans−synaptic signaling
heart development
cell morphogenesis involved in neuron differentiation
synapse organization
sensory organ development
small GTPase−mediated signal transduction
axon development
sensory system development
eye development
visual system development
regulation of small GTPase mediated signal transduction
establishment or maintenance of cell polarity
dendrite development
postsynapse organization
establishment of cell polarity
dendritic spine development
regulation of postsynaptic membrane potential
regulation of vascular associated smooth muscle cell migration
