Resistant vs Sensitive − Down : GO Biological Process
epidermis development
skin development
epidermal cell differentiation
humoral immune response
cell−cell adhesion via plasma−membrane adhesion molecules
keratinocyte differentiation
antimicrobial humoral response
antimicrobial humoral immune response mediated by antimicrobial peptide
collagen−activated tyrosine kinase receptor signaling pathway
collagen−activated signaling pathway
brain−derived neurotrophic factor receptor signaling pathway
antigen processing and presentation of peptide antigen via MHC class II
antigen processing and presentation of peptide or polysaccharide antigen via MHC class II
antigen processing and presentation of exogenous peptide antigen via MHC class II
antigen processing and presentation of exogenous peptide antigen
keratinization
MHC class II protein complex assembly
peptide antigen assembly with MHC class II protein complex
MHC protein complex assembly
peptide antigen assembly with MHC protein complex
