Resistant vs Sensitive − Down : KEGG
Cadherin signaling
Cell adhesion molecule (CAM) interaction
Cornified envelope formation
Cytokine−cytokine receptor interaction
Staphylococcus aureus infection
Rheumatoid arthritis
Intestinal immune network for IgA production
Complement and coagulation cascades
Hematopoietic cell lineage
Leishmaniasis
Inflammatory bowel disease
Viral protein interaction with cytokine and cytokine receptor
Viral myocarditis
Antigen processing and presentation
Asthma
Autoimmune thyroid disease
Allograft rejection
Graft−versus−host disease
Type I diabetes mellitus
Drug metabolism − cytochrome P450
